

BONITA BPM 6.5.1 RELEASE NOTES

TABLE OF CONTENTS

1.	General	3
1.1.	Product version	3
1.2.	Date of release	3
1.3.	Target audience	3
2.	Technical changes	4
2.1.	Migration	4
3.	Bugs fixed	5
3.1.	Bonita BPM Engine	5
3.2.	Bonita BPM Portal	6
3.3.	Bonita BPM Studio	7
4.	Related Links	8

1. General

1.1. Product version

6.5.1

1.2. Date of release

April 2nd, 2015

1.3. Target audience

This document is for technical users of Bonita BPM.

2. Technical changes

2.1. Migration

The migration tool is mandatory to migrate to this version. All information can be found in the [documentation](#).

3. Bugs fixed

3.1. Bonita BPM Engine

Summary

- BS-6643 Missing information in QUERABLE LOG
- BS-9011 BDM: wrong custom query generates an unclear message
- BS-12071 Weblogic 12c : Process execution fails (Hibernate proxy factory error)
- BS-12215 The method `org.bonitasoft.engine.api.ProcessAPI.retryTask` throws "no state found after FailedActivityStateImpl"
- BS-12431 Unable to resolve class when several process are started in parallel
- BS-12462 Low performance on case start with a user assigned to many actor mappings
- BS-12579 some expressions are evaluated without definitionId
- BS-12617 Process fails in cluster when there is a connector on enter of the process
- BS-12631 [Security]Unsigned task forms can be viewed and submitted by any user guessing the URL
- BS-12674 CannotResolveClassException: call activity failed because class loader of the parent process is used to archive the data instance of the sub process
- BS-12685 Method `ProcessRuntimeAPI.retryTask` does not retry failed connector
- BS-12748 Tenant initialization generates a work for failed call activity which generates a `SillegalStateTransition`
- BS-12754 Alfresco 4.2 Connector - 'Delete Item by ID' does not work

3.2. Bonita BPM Portal

Summary
<ul style="list-style-type: none">• BS-12296 Radio button Contingency - Selected Value is not updated if the list of available values is not updated as well• BS-12402 CSRF activation breaks mobile portal• BS-12415 REST API filtered results are inconsistent - Activity resource• BS-12482 Default entry form displayed at reload when Pool name contains spaces• BS-12630 Failed to deploy a BDM in JBoss bundle due to missing Datasource configuration• BS-12646 File widget preview images does not work properly• BS-12650 Enabling dynamic security rule on humanTask GET operation has no effect• BS-12673 Anti-CSRF attack Token is not generated/verified in Community edition

3.3. Bonita BPM Studio

Summary
<ul style="list-style-type: none">• BS-11412 Case start form's connectors are triggerred twice• BS-12362 Full Screen keyboard shortcut not working (F11)• BS-12493 Form fields not loaded correctly in different variables lists in expression editor• BS-12513 BPMN file exported in .bar is the saved model, although the process design is the potentially unsaved one opened in editor
